For the next sprint we will be taking on the following tasks:

1. Solve compatibility issues between automatic interface update and searching through appointments
2. Updating old code and reorganizing
3. Merging the separate projects into a single one
4. Add a grey icon for not relevant visits such as: past visits, future visits (further than today),late for too long, 5-10 minutes after arrived
5. Video of website demo
6. Change whatsapp message to just wether there is space or not
7. remove the auth0 login and google login, only keep outlook
