3. Agenda

Topic	Discussion
Problem case	We make a software to manage the parking spot in the premises of Sioux Technologies.
Description	-We make software to recognize the license plates. -You can use license plates from the internet for testing. -Visitors get notified by an SMS on their cellphone. -Information entry done by Sean before arrival. -Visitor license plate, phone number, and name (Required info from visitors). -There are two parking lots. You don't track the big parking lot.
Constraints	No constraints (You need reasoning for what you use.)
Deadline	15 weeks (5 sprints of 3weeks)
Schedule Meetings	Send mail to the client?
Representative Company	Sioux Technologies(Jan Willem Silfhout is Representative of the company.)
