For the next sprint we will be taking on the following tasks:

1. Update License plate recognition to work with live feed.
2. Automate Windows popup notification.
3. Make status icon for each appointment change automatically based on the status of the visitor without having to refresh the page.
4. Update search functionality to search through all columns at once instead of selecting a specific column.
5. Make form validation less intrusive.
6. Adding unit tests
